(54) Title: MODULAR VOLUMETRIC COMPRESSOR

(57) Abstract: A volumetric compressor (1) of the type comprising a pair of rotors (2) cooperating with each other and housed inside a compressor body (3), in which it is possible to identify a first flange (4), arranged on the suction side of the compressor body (3), and a second flange (5), arranged on the delivery side of the compressor body (3), suited to couplingly house a suction head (6, 7) and a delivery head (8, 9) of the volumetric compressor (1), wherein the suction head (6, 7) is provided with a first counterflange (10, 11), suited to be connected to the first flange (4), and comprises a coupling element (12) for connection to a suction pipe, or a coupling element (13) for connection to a suction pipe in combination with a motor unit (14), and the delivery head (8, 9) is provided with a second counterflange (15, 16), suited to be connected to the second flange (5), and comprises a coupling element (17) for connection to a delivery pipe, or a coupling element (18) for connection to a delivery pipe in combination with an oil separator (19).
